SUPPLEMENTAL INSTRUCTION

Supplemental Instruction (SI) is a form of peer tutoring and mentoring offered to students enrolled in historically difficult courses. It is an academic assistance program that increases student performance and retention. It has proven effective in helping students earn higher final course grades than students not participating in the program.

An SI mentor (a student selected by the instructor who has previously taken the course and demonstrated proficiency in the subject matter) provides students with supplemental information on lectures, tests and assignments. Mentors attend every class session and conduct three to five, fifty minute study groups each week at times convenient to the majority of students to review lecture material. Sessions normally occur in or near the course classroom instead of in a learning center. Sessions are attended on a voluntary basis and students are not segregated based on academic ability. Since SI is introduced on the first day of classes and is open to all students in the class, its in no way viewed as remedial. Mentors may also be reached via telephone or e-mail and provide students with supplemental information.

Below, is a list of Spring 2008 classes with Supplemental Instruction. So, take advantage of SI sections by enrolling early! These sections are identified in the schedule of classes by a note stating "Special tutorial assistance available in section."
