LACC DENTAL TECHNOLOGY

Department of Dental Technology

ABOUT

LACC's **Dental Technology Department** operates in state of the art and highly specialized facilities, where for more than 50 years instructors are able to educate, demonstrate, instruct and train students in basic and advanced restorative dental prosthetic technologies.

Curriculum content and classroom methodology continuously changes and includes instructions in both analogue and digital prosthetic dentistry, tailored to the needs and expectations of the dental industry. Graduating students are equipped with a comprehensive and strong foundation in restorative prosthetic dental technology, enabling them to achieve professional success.

The program is accredited by the **American Dental Association Commission on Dental Accreditation**, thus it comprises a rigorous curriculum in alignment with the prescribed dental prosthetic standards in the United States. Furthermore, the Program is one of the two accredited programs in California and one of the thirteen programs in the United States.

HIGHLIGHTS

- Designed to prepare students to pass the Certified Dental Technologist exams.
- Ranked #1 in the country with an overall Recognized Graduate comprehensive exam passing rate of 95%.
- Program Graduates gain employment in dental field, while in the program or upon graduation.
- Incites student's creativity and teaches independence, thus providing the ground tools for future entrepreneurs and leaders in the dental industry.
- One of the fastest growing professions according to the US Labor Department.
- Many graduates who become Master Ceramists earn annual incomes of \$65,000 and up. Graduates who open their own labs have incomes that can exceed more than \$100,000 annually.
- Program has students from all over the world.
- Diverse student population.
- Dental Prosthetic Technology program represents a valuable foundation for the students pursuing careers in clinical dentistry and plan to become a Dentist.
