

LA City College Construction Program

Student Services Center & Holmes Hall Projects

On Monday, January 27th, the construction phase for the New Student Services Center and Holmes Hall projects will commence. Access around the construction site will be provided from the parking structure and from the Student Union building to the main campus. Monroe Street will continue to be partially blocked with construction fencing, but will continue to provide narrow access to the main campus.

The Old Library will be leveled and a new Student Services Center will be constructed on the same pad. Soft demolition (low noise) will start the 2nd week of February. The noisy, heavy demolition, is expected to start the middle of March and last through April. Please be prepared for these necessary activities.

Student Services Center is scheduled to be completed by Fall 2015 and the Holmes Hall project completion is expected by Spring 2015.

We apologize for the inconveniences that the construction activities will create.

We are excited about these new projects that will enhance the learning experience at LA City College.

You may contact Scot Tedisco, Project Manager, with any questions at ext. 3087.

Sincerely,

Renee' D. Martinez, President

Los Angeles City College
